

# Nidia Vanessa Chávez Rendón

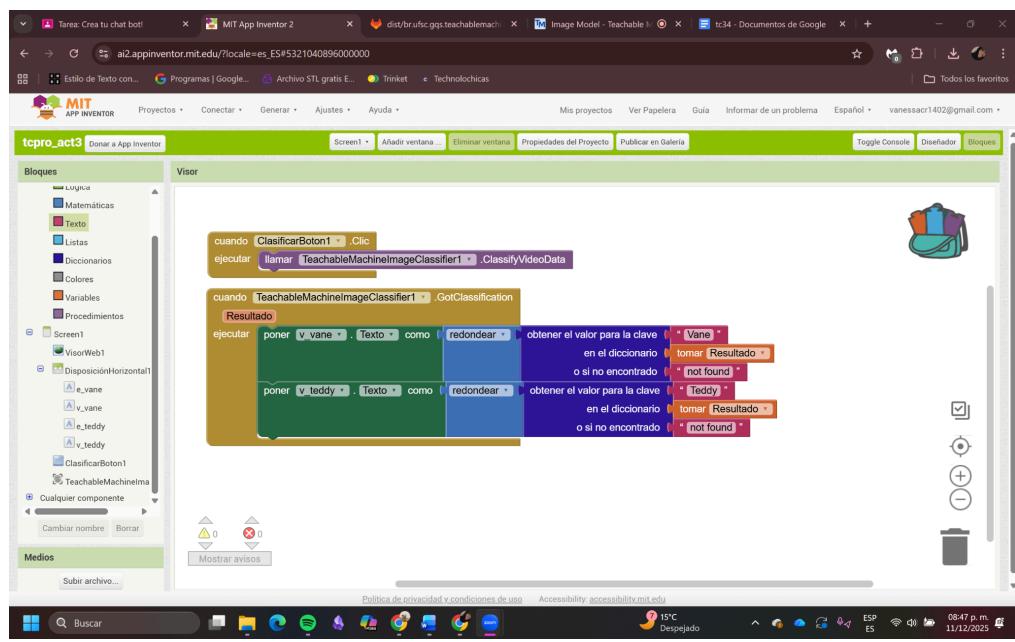

The screenshot shows a web browser with two tabs open. The top tab is a GitHub repository page for 'TMIC - Teachable Machine Image Classifier'. The repository path is 'br.ufsc.gqs.teachablemachineimageclassifier.aix'. The page displays a single file, 'chore: update extension file', last updated by Fabiano Oliveira on Aug 29, 2022. A download button for the file is visible. The bottom tab is the Teachable Machine website, specifically the 'Nuevo proyecto' (New project) section. This section offers three project types: 'Imagen' (Image), 'Audio', and 'Posturas' (Poses). Each type has a brief description and a preview image. The browser's status bar at the bottom shows the date as 11/12/2025 and the time as 08:14 p.m.
